Abstract

This indispensable two-volume handbook covers everything on this hot research field. The first part deals with the synthesis and the second focuses on such reaction types as cracking, hydrocracking, isomerization, reforming and other industrially important reactions with chapters written by the "Who's Who" of zeolite research. © 2010 Wiley-VCH Verlag GmbH & Co. KGaA.

Interphase injector device for the direct coupling of liquid chromatography and gas chromatography

Abstract

The invention relates to an interface injector device for the direct coupling of liquid chromatography and gas chromatography, comprising an outer body (1) with inner chambers (2a, 2b) separated by a dividing element (9, 11a); a first passage (3) of the first chamber (2a) to a waste duct (8); an inner tube (5) arranged in the the dividing element (9, 11a), and having a first section (5a) in the first inner chamber (2a), a second section (5b) in the second inner chamber (2b), and an inner c house an adsorbent material (6), and at least one inorganic wool material (7) retained in the first section (5a) of the inner tube by retaining means (7), a first openi with the waste duct (8) exclusively through the first inner chamber (2a).
